“ My focus is to add unquestionable value and leave behind a culture of success & self-sustainability. ”

I hold over 20 years of international manufacturing experience having worked in the U.S., Europe and Asia in a variety of industries. This experience directly corresponds with how I help manufacturers in Illinois. With so many different industries being represented, my diverse background aids in my ability to help a variety of manufacturers.

The past eight years, I have consulted with global, diverse manufacturing industries helping them in their Lean transformation journey. I work with companies to implement Lean Business Systems, quality management systems and process quality upgrades that bring improvement to and help transform the entire organization.

- Internal audit
- Root Cause Analysis
- Leadership training

Results

A client was seeking quality registration to a very specific standard that few people had experience in. I obtained the special standards, reviewed them and started working with the client team. They were able to pass the registration on the first audit and were one of the first in the state to receive registration to the special standard. careers. In addition to the core classes, elective course options were also intact. In completion of the certificate program, along with any required tests, a pay increase will occur.
