1

Upcoming IMEC Webinars

Date	Webinar Session
June 10	Real Estate Strategies for Manufacturing and Logistics Occupiers
June 11	Protecting Your Workforce: Industrial Hygiene Solutions
June 12	Overcoming a Crisis: An Operational Perspective
June 16	Investigating your Security Environment and Incidents - Fundamentals of Cyber Security Webinar Series
June 17	Manufacturing the Future: Challenges and Opportunities
June 18	Rebuilding Your Workforce Amidst a Global Pandemic Webinar
June 23	Cash Flow in a Crisis
June 24	Affordable and Approachable Automation for Metal Fabricators with Cobots
June 25	Strategic Plan for Returning Employees
June 30	Challenge the Status Quo – Pack Like a Rebel
July 9	Key Drivers of Revenue and Profit at Machine Shops

SCALE COMPUTING

MODERN VIRTUALIZATION

- Solutions for Distributed Enterprise, Small, and Midmarket IT
- Leader in SMB Infrastructure Market
 - Unique technology powered by 24 patents.
- Scale Computing's DNA
 - Radically simplified management
 - High availability designed in
- Comprehensive support
- Across all Industries
 - Retail, Healthcare, Education, Financial Services, Manufacturing, Government

SCALE COMPUTING

HISTORY

Scale Computing Incorporated

Scale Computing launches HC3 hyperconvergence

Apple saves >\$30M annually dropping VMware in favor of KVM

Lenovo & Scale for SMB, mid-market and enterprise

Scale Computing launches HC3 EdgeSM for edge computing

Scale Computing launches HE150 as smallest HCI edge appliance on the market

2008 2012 2015 2017 2018 2019

Scale Computing adopts KVM as the hypervisor for HC3 development

Google Compute Engine launched with KVM-based hypervisor to deliver VMs

1500+ customers adopted, Scale Computing continues as #1 KVM-based HCI vendor

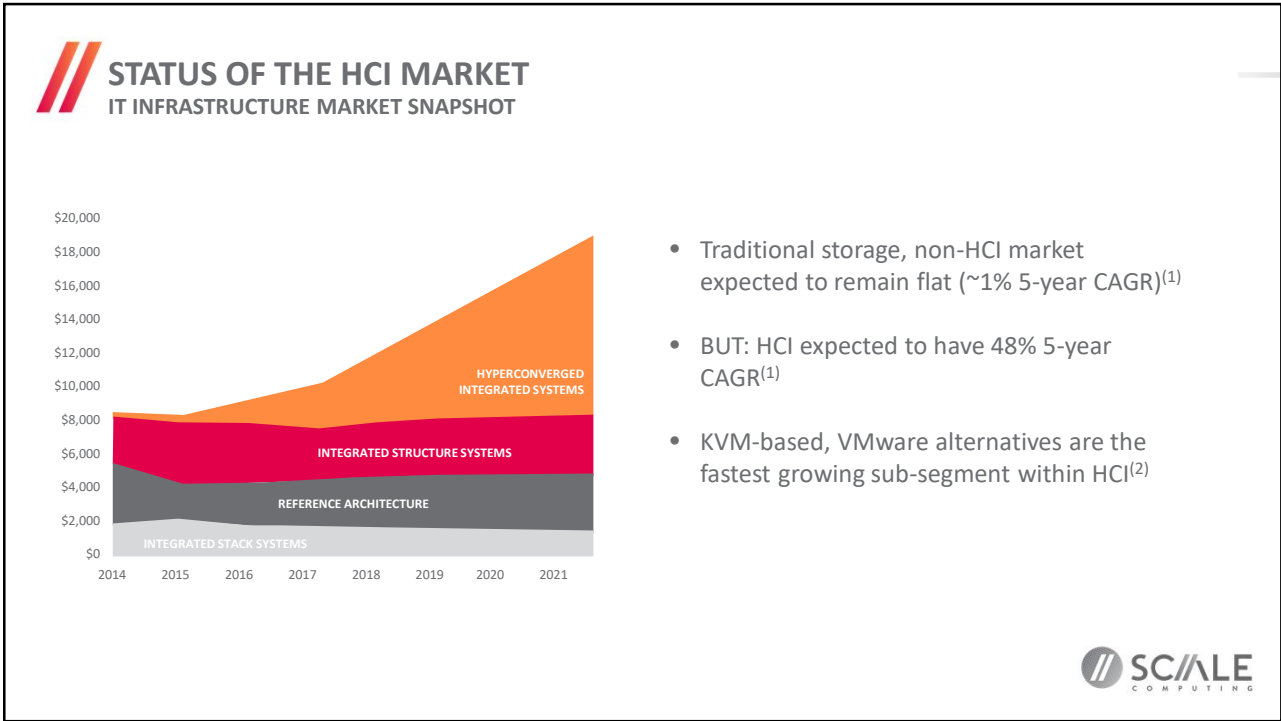

Lenovo

Introduction to the Scale Computing HC3 Hyperconverged Solution on Lenovo Servers

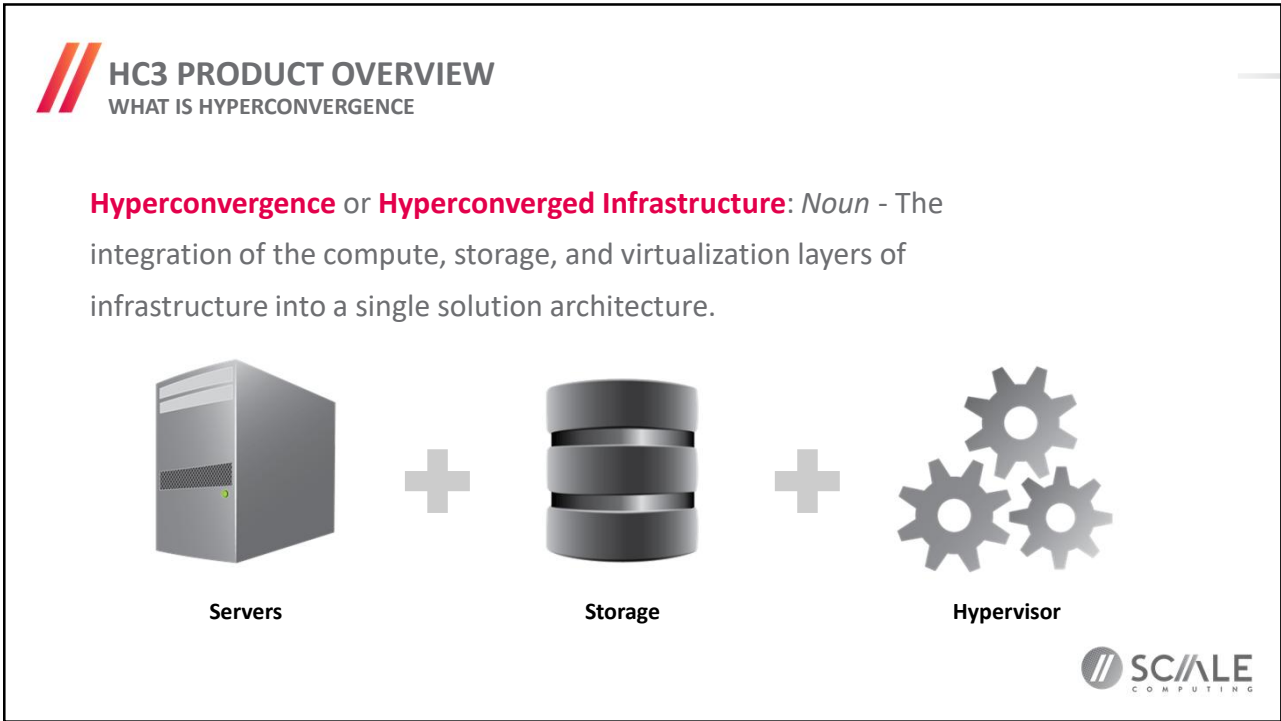

Scale Computing & Google launch HC3 Cloud UnitySM

Scale Computing & NEC Corporation launch NEC HCI

HC3 EDGE - HYPERCORE SOFTWARE STACK

- Integrated virtualization, storage, management software
- Centralized monitoring and management
- Integrated backup, replication and DR
- Designed for autonomous, self healing operation
- Ultra efficient resource usage
 - lowest possible hardware requirements and costs
- Multiple Redundancy / HA options
 - from multi-node autonomous clusters to single server operation
- Designed to handle all edge based workloads and applications
 - Legacy applications to modern designs, future proof
 - VMs, Virtual Appliances, SDN / NFV, Containers, Analytics

32GB RAM

8GB RAM

Available Resources 8GB

Other Operating Platforms System Resources 24GB

Available Resources 28GB

HC3 Operating Platforms 4GB

Available Resources 6 – 7GB+

HC3 Operating System (<1GB)

HC3 PRODUCT OVERVIEW

INTRODUCING HC3

Simplicity

- Unified Management
- Pre-configured Storage
- Deploys in < 1 hour

Availability

- Self-Healing
- Backup/Replication
- DRaaS

Scalability

- From Single Node
- Seamless Scale-Out
- Mix-and-Match

Affordability

- Complete Stack
- No Software Licensing
- Low Price, Lower Costs

10

HC3 BACKUP & DISASTER RECOVERY STRATEGIES

HC3 DATA PROTECTION SUITE

The diagram illustrates three main strategies for HC3 data protection:

- HC3 Snapshots and HA (Site 1):**
 - Instant restore
 - Clustered high availability
 - Snapshot cloning and export
- HC3 Remote Replication (Site 2):**
 - Continuous replication
 - Many-to-one support
 - Failover, fallback, restore
 - Low RPO/RTO
 - Optional replication to HC3 Cloud Unity
- HC3 Local Replication Target (NAS):**
 - Failover, fallback
 - Rapid restore

Additional features include:

- Agentless VM protection
- Easily managed within HC3
- No additional licensing
- Single node support
- Integrated file-level restore
- Instant recovery of VMs/virtual disks
- Flexible, policy-driven scheduling
- Application-consistent snapshots

LEOSTREAM AND SCALE COMPUTING

VDI WITH HCI FOR BETTER ROI

- Intuitive VDI** - Replace complicated VDI software stacks and expensive hardware with a single, neatly contained platform with rapid, easy deployment
- Innovative Design** - Hyperconverged infrastructures replace and simplify traditional datacenter infrastructures
- Simplified Provisioning** - Provision pools of Windows and Linux desktops from a single master image including persistent or non-persistent desktops, shared or personal desktops, and everything in between.
- VDI for All** - Support nearly any display protocol, including in-browser HTML5 RDP, VNC, and SSH access, from almost any client device - including thin clients, Chromebooks, and tablets.

The diagram shows the VDI architecture flow:

- Users and Leostream Connect Clients** connect to **HC3**.
- HC3** handles **Login Traffic** and **Desktop Connection Traffic**.
- HC3** connects to a **Leostream Connection Broker**.
- The **Leostream Connection Broker** manages **Desktops with Leostream Agents**.
- Leostream Agent Traffic** flows between the agents and the broker.
