CMMC Cybersecurity Training for Manufacturers

CMMC Cybersecurity 15-Part Training Series for Manufacturers

August 2021 - October 2022 | First Wednesday of Every Month

By 2025, manufacturers must verify Cybersecurity Maturity Model Certification (CMMC) to retain current or earn new contracts through the U.S. Department of Defense as a prime or subcontractor. IMEC is providing this series to guide your business to meet these qualifications.

Monthly Virtual Training, Actions Steps and Check Ins

Training begins August 4, running through October 2022

- Live, virtual training hosted on first Wednesday of every month from 8:30am -11:30am
- Presentation on set of CMMC control family with ample time for Q&A
- All session recordings, resources, and materials available for download after class
- Guidance to draft and review your written policies and procedures specific to the control family covered in training
- Monthly check in with an IMEC specialist as a sounding board and liaison to cybersecurity experts

Benefits and Registration Details

- \$10,000 value / company
- \$4,000 list price / company
 - Unlimited participants from company - attendees can vary by month
 - Access to all recorded sessions, training materials, and resources
 - 45 hours of total training from experts at Cerberus Sentinel
 - Up to 15 hours of IMEC check-in and light coaching
