Singapore International Water Week (SIWW) is one of the leading global water shows in the world, focusing on sharing knowledge, exchanging best practices, and fostering business opportunities on technology, innovation and solutions to tackle the emerging challenges facing urban communities in Southeast Asia. An international show with a regional footprint, SIWW attracts solution providers, Original Equipment Manufacturers (OEMs) and matches them with regional utilities, industrial end users and government officials to generate new partnerships.

As one of the first international water shows to be held in-person in Asia since the COVID-19 pandemic, SIWW 2022 (April 17-21, 2022) is expected to attract over 10,000 regional and international attendees. This webinar will share highlights of the event, including the Water Expo and hosted programs that will bring visitor traffic to the show.
