

MEPNN Supplier Scouting Opportunity Synopsis

Section 1: General Information

Scouting Number	2025-014
Item to be Scouted	Large Power Transformer
Days to be scouted	30
Response Due By	02/07/2025
Description	230kV to 765kV Transformers to be used in new substation and transmission line. Grid Deployment Office (GDO) is scouting for recipients of any available domestic large power transformers.
Notify Requester Immediately	
State item to be used in	Minnesota

Section 2: Technical Information

Type of supplier being sought	Manufacturer
Reason	BABA
Describe the manufacturing processes (elaborate to provide as much detail as possible)	Electrical / Mechanical Assembly to meet the BABA domestic percentages for manufactured products
Provide dimensions / size / tolerances / performance specifications for the item	various - see attached sheet for additional information
List required materials needed to make the product, including materials of product components	electric grade steel
Are there applicable certification requirements?	Yes
Certification(s) required	IEEE
Are there applicable regulations?	Yes
Details	BABA compliant
Are there any other standards, requirements, etc.?	No
NAICS 1	335311 Power, distribution, and specialty transformer manufacturing
NAICS 2	
Additional Technical Comments	

Section 4: Business Information

Estimated potential business volume	1 of each: 230kV, 345kV, and 765kV large power transformer
Estimated target price / unit cost information (if unavailable explain)	\$2-\$6 million
When is it needed by?	6 months to 12 months
Describe packaging requirements	depends, varies as needed and applicable
Where will this item be shipped?	Various, for Bipartisan Infrastructure Law (BIL) funded projects recipients under Department of Energy's Grid Deployment Office

Additional Comments

Is there other information you would like to include?
